In 1985 - Lycée Girard, Avignon, France : Baccalauréat E, mathematics

Bio

[OSEO](#) expert, I am also Executive Committee Member of the [ANR \(National Research Agency\)](#) advanced research funding national organisation, as well as Executive Committee Member of the [RIAM](#) which supports research & development projects through joint [CNC](#) and [OSEO](#) financial support.

In 2010, I joined [LeKiosque.fr](#) as VP Products & Chief Technology Officer (CTO) where I created the first 3D newsstand in the World! This revolutionary product immediately skyrocketed as #1 grossing app in Apple App Store in France with more than 800K users (more : [the first 3D newsstand in the world](#))

In May 2007 I joined the startup [MobiLuck.com](#) as the Chief Technology Officer (CTO) which is focused on [geolocalized social network for mobile phones](#). This LBS friends finder service displays 35M pages/month and has attracted more than 1.2M users (Q2 2009) since its launch in August 2007 and currently recruits an average of 5K users per day as per the current trend and we see our traffic doubling every quarter! Our technology is carrier-independant and the service works worldwide as it is available in more than 10 languages.

Before and for about 4 years, I was the In-Fusio/MobileScope's Advanced Technology Manager where I created a [mobile phone massive cross-platform multi-player technology](#) and service for the Group and [designed and developed a Google Earth-like technology](#) for UMTS and HSDPA mobile phones for Orange.

Before, [I've been in the video game industry for 10 years](#) where I successively developed titles, created and sold realtime 3D technologies and, finally, took in charge one of the business unit of Kalisto Entertainment to handle two 4M euros-budget games.

Professional experience

2010 - today **Chief Technical Officer (CTO) & VP products** | [LEKIOSQUE.FR](#), FRANCE: digital magazines newsstand - 35 people

Member of the board, in charge of technology and product roadmap:

- Designer and product manager of the first 3D newsstand in the world available for the iPad and iOS devices;
- Setup and day-to-day management of the R&D/production subsidiary in Tangier, Morocco (20 fulltime engineers)
- closing technology partnerships
- HR and looking for talented people;
- Looking for financial aids thru government and european financing vehicles;
- Management of outsourcing (including offshore) and external resources, writing contracts;
- Addressing platform scalability by migrating to the cloud (storage and CPU).

RECOMMENDATIONS

" Stéphane stands out through his wide ranging knowledge and development skills. He combines a unique entrepreneurial attitude to getting things done within the organisation with the technical ability to translate complex and speculative concepts into polished demonstrable products. I saw this happen on three projects (3D engine, more impressively still a massively multiplayer infrastructure and lately mobilezoo) during which I had the pleasure of working with Stéphane. A definite recommendation."

January 4, 2007

Giles Corbett, co-CEO, In-Fusio
managed Stéphane indirectly at IN-FUSIO

"Stephane brings a lot of knowledge and a real ability to push forward projects while understanding and even promoting the business impacts of the projects he was working on."

August 27, 2006

Thomas Landspurg, CTO, In-Fusio
managed Stéphane at IN-FUSIO

"Few years ago, I hired Stephane de Luca as a project manager. Then he became a chief of a technical department. After that, he helped to rescue a 6M? project. He redefined the product problematic. He reorganized the tech team and put the technology side back on track. He personally helped to coach important team leaders. He impressed me with his skills in communication, leadership and technology."

January 5, 2007

Daniel Cohen, COO, Kalisto Ent.
hired Stéphane as a technical in 1999

"I have worked with Sdl for long. He is a great world-class technical manager with an entrepreneurial mind. Pragmatic, and rational, he led large interactive projects to success by proposing and executing innovative management methods. I everyday measure the acuity of his advanced vision and management style which I still haven't found the equivalent in today's other projects.? March 31, 2006"

Stephane Le Dorze, Technical Director of Heroes BU, kalisto
reported to Stéphane at Kalisto

Professional experience

2009 - 2010 Acting as Senior Production Manager (COO) | MIMESIS REPUBLIC, FRANCE: social network - 3D MMO - 70 people
2 years

5-month freelance mission as Chief Operating Officer (COO) at mimesis-republic.com in order to industrialize the production of the service, which step was required to raise X M euros. I've installed a SCRUM-based agile methodology and stopped fuzzy management and clarified managers' roles. I've implemented a streamlined decision making process and restructured some departments and installed a simplified product roadmap strategy.

2007 - 2009 Chief Technology Officer | MOBILUCK, FRANCE: Mobile phones and Services - Mososo - 20 people
3 years

Mobiluck: Closer to my friends. Launch of a mobile service focused on geolocalization and social networking. Users are geolocalized automatically so that they benefit from advanced features such as find the nearest indian restaurant or meet handsome people close to them. Users receive SMS alerts when their friends come close. Traffic is currently 35M pages/month with 10% monthly increase with more than 1.2M users worldwide (Q2 2009). The business model relies on ad distribution based on users' profile and localization. Premium accounts are currently being developed. Development of an iPhone app.

Technical environment:

- Architecture and administration of a Linux cluster (Debian, Gentoo),
- Server-side development in LAMP : Linux, Apache, MySQL et PHP
- Client-side development in XHTML and XHTML Mobile
- iPhone development in Objective-C/Cocoa: geolocalisation API, networking and communication with the back-office
- Facebook app development: enable facebook user to run mobiluck from within Facebook
- Many third-party interfacing through web services: Twitter, Yahoo!, Google, Maporama, SMS brokers, advertising agency, geomapping, etc.
